

Dear Heel.Sit Parents,

We will be offering enrichment breakfasts to all boarding and daycare dogs. Food enrichment helps dogs start their day off on the right foot by burning some mental energy as they eat. All dogs can benefit from this but its especially great for dogs who are very high energy or anxious. Eating is a calming activity. Using creative ways to give dogs their meals helps build food drive and good eating habits. It can also help with resiliency and work ethic which is great for reaching training goals. This enrichment can include slow feeders, food puzzles, food toys, scatter feeds, and healthy additives such as greek yogurt, peanut butter, pumpkin, fruits and veggies. Owners are responsible for bringing their dogs regular breakfast to use for these activities. We will provide the additives and equipment.

It is important to note that adding new foods to a dogs diet can cause some initial stomach issues such as loose stool. We will add foods in small amounts to start and do our best to not overload their systems. Allergies are also a risk, but we will mitigate this by only adding one new food in a small amounts at a time.

If you would like your dog to participate in these beneficial activities please sign the form below releasing Heel.Sit and employees from liability if your dog as any ill side effects.

----- CUT ALONG THIS LINE -----

Parent Consent Form

I would like my dog to participate in fun enrichment activities and agree not to hold Heel.Sit or any employees responsible for any poop issues that may arise.
